## OIL CHANGE

An engine oil change is recommended for your Audi or Volkswagen every 3,000 miles or as specified for your precise model. Having the oil and oil filter changed regularly is perhaps the most important thing you can do to avoid unnecessary repairs and help keep your Audi or VW engine running like new.

Auto Plus in Albany / Berkeley matches the oil's viscosity to your Audi or VW engine, and adheres to the official factory service manuals for any other specific oil requirements. For example, synthetic oil is expressly called for in some Audi and Volkswagen engines.

To make sure your Audi or VW is always in optimal condition, Auto Plus recommends regularly checking the following fluids: engine oil, transmission oil, brake fluid, radiator antifreeze/coolant, and windshield washer fluid.

Trust the experts at Auto Plus for your Audi or VW oil and oil filter change, and for all of your Audi or Volkswagen service, maintenance, and repairs.

# BRAKES

Adhering to the maintenance schedule specified in your Audi or Volkswagen owners manual helps you know when the brakes on your vehicle require servicing. If you are not sure how frequently the brake fluids, brake pads, or brake rotors should be checked or replaced, simply ask the experts at Auto Plus.

Paying attention to some of the signs of brake wear on your Audi or VW can keep you on top of brake maintenance. For example, if you notice that your vehicle requires a greater distance to stop, or that the brake pedal travels farther than it did previously, have Auto Plus check the brakes. If the steering wheel shakes or vibrates in your hands when your Audi or VW comes to a stop, the brake rotors might be warped, and could need replacing.

The brake technicians at Auto Plus are certified by the California Department of Consumer Affairs. Auto Plus also performs brake and lamp inspections as required and specified by the California DMV. Trust Auto Plus in Albany / Berkeley to keep your Audi or Volkswagen brakes performing at their best.

**Call Auto Plus today...your local Audi and Volkswagen experts for brake service, maintenance, and repairs serving Albany, Berkeley, the East Bay Area and Northern California since 1980.**

## DIAGNOSTIC

Audis and Volkswagens have advanced and sophisticated electronics and computerized systems that require special diagnostic tools and equipment. Auto Plus in Albany/Berkeley is a state-of-the-art facility to accurately diagnose, maintain, and repair your Audi or VW.

Auto Plus also performs pre-purchase diagnostics, so if you are planning to purchase a pre-owned Audi or VW, we can diagnose it and provide you with a complete list of items that need to be repaired or replaced and an estimate of the cost, so you can negotiate with the seller for the most appropriate price.

Proper Audi and Volkswagen diagnosis requires professional training, tools, equipment, and expertise. Auto Plus excels at correctly diagnosing and repairing any issues your Audi or VW might have, bringing it back to the road quickly, properly, safely, and affordably.

## SUSPENSION

The condition of your Audi or VW suspension affects ride quality, comfort and safety, handling amd braking, interior and exterior noise, and has a direct effect on your vehicle's other components and systems, including its brakes and tires.

Your Audi or Volkswagen suspension is responsible for quietly and effectively bearing the weight of your Audi or VW and its passengers, while absorbing and deflecting the punishment of bumpy and uneven roads, potholes, and all of the other demands placed upon it during the course of normal driving.

You might not notice how well your Audi or VW suspension is working unless it requires attention by making a bit of noise to let you know that it would like you to bring it to our expert mechanics at Auto Plus.

**Call Auto Plus today ... your local Audi and Volkswagen experts for suspension service, maintenance, and repairs serving Albany, Berkeley, San Francisco, the East Bay Area, and the Northern California Bay Area since 1980.**
